April 30, 2014

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The following discussion and analysis should be read in conjunction with the annual audited consolidated financial statements of Hunt Mining Corp. (the "Company" or "Hunt") for the year ended December 31, 2013 and all of the notes, risk factors and information contained therein.

The audited annual financial statements for the years ended December 31, 2013 and 2012 have been prepared in accordance with IFRS issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

Introduction

This management discussion and analysis ("MD&A") is dated April 30, 2014 and is in respect of the year ended December 31, 2013. All dollar amounts referenced, unless otherwise indicated, are expressed in Canadian funds.

The following discussion of the financial condition and results of operations of the Company should be read in conjunction with its annual audited consolidated financial statements and related notes for the year ended December 31, 2013. This section contains forward-looking statements that involve risks and uncertainties. The Company's actual results may differ materially from those discussed in forward-looking statements as a result of various factors, including those described under "Forward-Looking Information".

Forward Looking Information

This MD&A contains "forward-looking information" and "forward-looking statements" (together, "forward looking statements") within the meaning of Canadian securities legislation and the United States Private Securities Litigation Reform Act of 1995. Such forward-looking statements concern the Company's anticipated results and developments in the Company's operations in future periods, planned exploration and development of its properties, plans related to its business and other matters that may occur in the future. These statements also relate to the ability of the Company to obtain all government approvals, permits and third party consents in connection with the Company's exploration and development activities; the Company's ongoing drilling program; the Company's future exploration and capital costs, including the costs and potential impact of complying with existing and proposed environmental laws and regulations; general business and economic conditions; analyses and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Statements concerning mineral resource estimates may also be deemed to constitute forward-looking statements to the extent that they involve estimates of the mineralization that will be encountered if the property is developed. Any statements that express or involve discussions with respect to predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance (often, but not always, using words or phrases such as "expects" or "does not expect", "is expected", "anticipates" or "does not anticipate", "plans", "estimates" or "intends", or stating that certain actions, events or results "may", "could", "would", "might" or "will" be taken, occur or be achieved) are not statements of historical fact and may be forward looking statements. While the Company has based these forward-looking statements on its expectations about future events as at the date that such statements were prepared, the statements are not a guarantee of the Company's future performance and are subject to risks, uncertainties, assumptions and other factors which could cause actual results to differ materially from future results expressed or implied by such forward-looking statements. Such factors and assumptions include, amongst others, the effects of general economic conditions, the supply and demand for gold and the level and volatility of prices of gold, the availability of financing to fund the Company's ongoing and planned exploration and possible future mining operation on reasonable terms, changing foreign exchange rates and actions by government authorities, market competition, risks involved in mining, processing, exploration and research and development activities, the political climate in Argentina, the Company's ongoing relations with its employees and exploration partner and with local communities and local governments, and uncertainties associated with legal proceedings and negotiations and misjudgments in the course of preparing forward-looking statements. In addition, there are also known and unknown risk factors which may cause actual events

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

or results to differ from those expressed or implied by the forward-looking statements, including, without limitation:

- risks related to the Company's lack of revenues from operations and its continued ability to fund ongoing and planned exploration and possible future mining operations;
- risks related to the Company's history of losses, which will continue to occur in the future;
- risks related to governmental regulations;
- risks related to the uncertainty of the Company's ability to attract and retain qualified management;
- risks related to the Company's ability to successfully establish mining operations or profitably produce precious metals;
- volatility in the market price of gold, silver and other minerals which could affect the profitability of possible future operations and financial condition;
- risks related to currency volatility;
- risks related to the inherently dangerous activity of mining, including conditions or events beyond the Company's control;
- risks related to the Company's primary properties being located in Argentina, including political, economic, and regulatory instability;
- uncertainty as to actual capital costs, operating costs, production and economic returns relating to potential mining operations;
- uncertainty in the Company's ability to obtain and maintain certain permits necessary for current and anticipated operations;
- risks related to the Company being subject to environmental laws and regulations;
- risks related to land reclamation requirements and loss of the Bajo Pobre property due to inability to meet contractual obligations;
- risks related to the Company's ability to attract necessary capital funding for mineral exploration in the future;
- risks related to officers and directors being or becoming associated with other natural resource companies which may give rise to conflicts of interests; and
- the volatility of the Company's common share price.

This list is not exhaustive of the factors that may affect the Company's forward-looking statements. Some of the important risks and uncertainties that could affect forward-looking statements are described further in this MD&A under "Risk Factors". Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the forward-looking statements. Forward-looking statements are made based on management's experience, beliefs, estimates and opinions on the date the statements are made, and the Company undertakes no obligation to

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by law.

Investors are cautioned against attributing undue certainty to forward-looking statements.

Overall Performance

The Company is a mineral exploration company incorporated under the laws of Alberta, Canada and, together with its subsidiaries and properties, is engaged in the exploration of mineral properties in Santa Cruz province, Argentina.

Mineral Exploration Activity

Amanita

On September 20, 2013, the Company announced it had signed a letter of intent "LOI" for the Amanita project in the Fairbanks mining district in the state of Alaska.

Amanita is an advanced exploration gold target previously leased by Kinross Gold Corporation "Kinross" between 1998 and 2001. During that time, Kinross defined a 5,000 by 12,000 foot gold soil anomaly, completed 15,300 feet of reverse circulation drilling and identified an oxide gold zone to a 300 foot depth.

The Company had a 3 month due diligence period to evaluate the project, the due diligence period ended December 12, 2013. The Company elected not to proceed with the proposed Amanita project.

La Josefina

During 2012, the Company conducted reconnaissance exploration on the La Josefina project while it worked to complete the negotiation of an amendment to the La Josefina agreement; this was completed and signed on November 15, 2012. The Company plans to work on regional analysis of the La Josefina project for the remainder of 2013. The objective of this work is to attempt to identify additional high-grade veins on the property.

The Company, under its new agreement with Fomento Minero De Santa Cruz Sociedad Del Estado ("Fomicruz") has until 2019 to complete exploration work and make a decision to advance the project to production.

Additional details regarding the reconnaissance exploration and the recommended work programs relating to the La Josefina project are included in the Company's technical report dated September 29, 2010 (the "Technical Report") and filed on SEDAR on October 4, 2010. Detailed results of the La Josefina drilling program are included in the Company's website, www.huntmining.com. The La Josefina property is the Company's most advanced exploration property.

On January 15, 2013, the Company announced details for the recently signed amendment to its agreement with Fomicruz regarding the La Josefina project in Santa Cruz Province, Argentina.

On May 7, 2013, the Company added the La Josefina project to its Exploration agreement with Eldorado Gold Corp ("Eldorado"). The Company received a one-time payment of \$125,000.

On July 10, 2013, the Company received notice from Eldorado they were terminating their exploration agreement with the Company. Because of the termination of the exploration agreement, the Company now has complete exploration control on the La Josefina project.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The Company has been actively pursuing a new exploration partner for the La Josefina project, as of the date of this filing these discussions are still in process.

La Valenciana

On November 15, 2012 the Company signed an agreement with Fomicruz for the La Valenciana project in the province of Santa Cruz, Argentina. The La Valenciana project lies to the west and is contiguous to The Company's La Josefina project. The project is also contiguous to and north of the Joaquin Silver-Gold project.

The agreement with Fomicruz requires the Company to spend USD \$5,000,000 in exploration on the project over 7 years. If the Company elects to exercise its option to bring the La Valenciana project into production it must grant Fomicruz a 9% ownership in a new Joint Venture Corporation ("JV Corporation") entity to be created by the Company to manage the project. If Fomicruz elects to increase their ownership they can under the following formula up to a maximum of 49% interest.

- To purchase an additional 10% in the JV corporation, Fomicruz must reimburse the Company for 10% of the exploration expenses made by the Company during the exploration period;
- To purchase the next 10% interest in the JV corporation, Fomicruz must reimburse the Company for 20% of the exploration expenses made by the Company during the exploration period;
- To the purchase a final additional 20% interest in the JV Corporation, Fomicruz must reimburse the Company for 25% of the exploration expenses made by the Company during the exploration period; bringing Fomicruz's total ownership interest in the JV Corporation to 49%.

At the Company's option it can purchase all but the original granted 9% ownership interest from Fomicruz for USD \$200,000 per percentage point owned down to 9%. The remaining 9% can be purchased for a mutually agreed amount to be determined by negotiation between Fomicruz and the Company.

On February 21, 2013, the Company announced exploration results from the La Valenciana project.

The Company is not planning any work on the La Valenciana project for the remainder of 2013. The Company is evaluating its 2014 exploration plan which could include regional sampling, mapping and ground geophysics.

On May 7, 2013, the Company added the La Valenciana project to its Exploration agreement with Eldorado. The Company received a one-time payment of \$200,000 and ongoing yearly lease payments of \$125,000, as long as the La Valenciana project is considered a Stage II project under the Eldorado agreement.

On July 10, 2013, Eldorado elected to terminate the exploration agreement they had with the Company. As a result of their termination of the agreement, the Company now has complete exploration and operational control of the La Valenciana project.

The Company has been actively pursuing a new exploration partner for the La Valenciana project, as of the date of this filing these discussions are still in process.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Bajo Pobre

The Company has conducted cursory reconnaissance activities on the Bajo Pobre property. The Company has completed all lease payments to FK Minera, the owner of the Bajo Pobre property, but has not completed all the required work commitments relating to the Bajo Pobre property. The Company is currently in negotiations to secure a contract amendment in this regard.

The Company completed detailed geological mapping, surface soil sampling and advanced drill targeting during 2012 on the Bajo Pobre project. The Company did not carry out any exploration work on the Bajo Pobre project in 2013.

Other Projects:

The Company has completed an analysis of the regional data generated from the Eldorado Exploration agreement with the goal of identifying new precious metal targets in its Santa Cruz property portfolio. The Company is now determining which properties continue to have merit and warrant further generative exploration.

Events Occurring Subsequent to the Close of the Year Ended December 31, 2013

In January 2014, the Company sold the 2,000 shares that remained in marketable securities as at December 31, 2013 for \$42,625.

On April 4, 2014, the Company granted 2,850,000 stock options at an exercise price of \$0.10 per share to certain directors and officers of the Company. The options granted vest immediately and expire on April 4, 2019.

Selected Financial Information

The Company's financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

A summary of selected financial information for the most recent two fiscal years ended December 31, 2013 is as follows:

	Year ended	
	December 31, 2013	December 31, 2012
Net loss for the period	(2,680,088)	(4,172,082)
Net loss for the period – basic and diluted loss per share	(\$0.02)	(\$0.04)
Total assets	5,002,767	7,701,979
Total non-current liabilities	125,000	125,000
Cash dividends	-	-

The Company's net loss was significantly lower in 2013 compared to 2012 due to the Company's exploration partner funding the majority of its operations in Argentina and project payments totaling \$450,000. Also, a \$616,331 present value adjustment related to VAT receivable was recorded for the year ended December 31, 2012.

The Company has chosen to expense its exploration and evaluation expenditures as incurred.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

In the years ended December 31, 2013 and December 31, 2012, the Company incurred exploration expenses of \$667,796 and \$594,904, respectively. Primary components of exploration expenses in 2013 and 2012 are given in the following table:

	Years ended	
	December 31,	December 31,
	2013	2012
Assay expense	\$ 109,051	\$ 122,461
Equipment rental expense	48,713	68,325
Fuel expense	108,802	159,310
Property payments	165,144	99,209
Property reports	3,126	10,120
Other	232,960	135,480
	\$ 667,796	\$ 594,904

The Company's overall exploration expenses were slightly higher in 2013 compared to 2012 because the Company had increased expenses related to exploration camps, mineral claim fees and truck rentals. The Company's exploration expenses for the year ended December 31, 2013 were higher compared to the year ended December 31, 2012 because of the termination of the Exploration agreement with Eldorado. The Company reduced the number of staff members in its Argentine exploration team which has resulted in lower exploration expenses.

The Company recovered exploration and operating expenses from its exploration partner according to the following table:

	Years ended	
	December 31,	December 31,
	2013	2012
Exploration expenses	\$ 346,120	\$ 445,555
Professional fees	74,691	109,891
Administrative and office expenses	327,653	142,835
Payroll expenses	924,955	912,839
Travel expenses	116,613	183,946
	\$ 1,790,032	\$ 1,795,066
Exploration cost recovery	\$ 1,790,032	\$ 1,795,066

Exploration expenses were allocated to the Company's properties according to the following table:

	Years ended	
	December 31,	December 31,
	2013	2012
La Josefina	\$ 222,318	\$ 315,110
La Valenciana	173,277	-
Bajo Pobre	230,744	67,964
Other	41,457	211,830
	\$ 667,796	\$ 594,904

For the year ended December 31, 2013 the major components of Administrative and Office expenses were \$40,364 on account of camp rent (as compared to \$104,716 in 2012) and miscellaneous expense relating to the La Josefina project of \$37,391 (as compared to \$166,388 in 2012).

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Results of Operations

Year ended December 31, 2013 as compared to the year ended December 31, 2012

For the year ended December 31, 2013 the Company generated a net loss of \$2,680,088, or \$0.02 per share, compared to a net loss of \$4,172,082, or \$0.04 per share, for the year ended December 31, 2012. The decreased net loss and net loss per share was primarily the result of the recovery of costs from the Company's exploration partner and, to a lesser extent, from reduced administrative, office and payroll expenses as well as reduced professional fees and reduced stock based compensation expense.

The Company generated interest income of \$49,626 for the year ended December 31, 2013, down from \$67,708 for the year ended December 31, 2012. The Company incurred net operating expenses of \$2,582,371 for the year ended December 31, 2013, down from \$3,770,429 for the year ended December 31, 2012. The decrease in the net operating expenses in 2013 was mainly the result of reduced professional fees, office expenses, payroll expenses and the recovery of costs from the Company's exploration partner.

The Company intends to continue exploration work on the La Josefina property in accordance with the Fomicruz agreement.

Other assets include Value Added Tax ("VAT") receivable as of December 31, 2013 of \$548,676. This amount reflects the credit accrued due to the payment of VAT on certain transactions in Argentina. The Company plans to seek reimbursement on the VAT if and when the exploitation of minerals has commenced. This asset is reported at net present value on the Company's condensed interim consolidated statement of financial position.

Summary of Quarterly Results

	December 31, 2013 \$	September 30, 2013 \$	June 30, 2013 \$	March 31, 2013 \$
Net loss for the period	(920,250)	(848,145)	(301,615)	(610,078)
Net loss per share – basic and diluted:	(0.00)	(0.01)	(0.00)	(0.01)
Working capital	1,967,559	2,656,074	3,504,456	3,807,880

Total shareholders' equity	6,639,883	8,144,485	8,909,186	9,131,729

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The Company had an increase in its net loss for the three month period ended December 31, 2012 primarily due to an adjustment to the value of the Company's VAT; this reduced the value of the VAT by US\$609,218 and to a lesser extent the settlement of the Company's rent obligation at its former office and year end audit expenses.

During the twelve month period ended December 31, 2012 the Company had a decrease in its net loss compared to the prior period as the Company recognized a reduction in the value of the carrying value of its VAT receivable, this resulted in the Company recognizing a large expense. To a lesser extent the Company also had more exploration activity during the period.

During the nine month period ended September, 2012 the Company was able to significantly decrease its net loss for the period due to the exploration agreement with Eldorado. Because of this agreement, the Company was able to earn revenue from completing exploration activity on certain projects on Eldorado's behalf. To a lesser extent the reduced net loss was also due to limited exploration activity on the Company's La Josefina project and overall reduced activity during the Argentine winter.

Capital Resources and Liquidity

The Company does not have any cash flow generating properties. As at December 31, 2013, the Company had \$2,364,062 in cash and short term investments and working capital of \$1,967,559. As at April 30, 2014, the Company had approximately \$1.5 million in cash and short term investments.

Going Concern

The accompanying consolidated financial statements have been prepared under the assumption that the Company will continue as a going concern. The Company is an exploration stage company and has incurred losses since its inception. As shown in the accompanying consolidated financial statements, the Company has had no revenues and has incurred an accumulated loss of \$31,176,283 through December 31, 2013. However, the Company has sufficient cash at December 31, 2013 to fund operations for the next 12 months.

The Company's ability to continue as a going concern is dependent upon the discovery of economically recoverable mineral reserves, the ability to obtain necessary financing to complete development and fund operations and future production or proceeds from their disposition. Additionally, the current capital markets and the deteriorating commodity markets worldwide are significant obstacles to raising the required funds. These factors raise substantial doubt about the Company's ability to continue as a going concern.

The consolidated financial statements do not include any adjustments that might be necessary should the Company be unable to continue as a going concern. If the going concern basis was not appropriate for these consolidated financial statements, adjustments would be necessary in the carrying value of assets and liabilities, the reported expenses and the balance sheet classifications used.

Transactions with Related Parties

During the year ended December 31, 2013, the Company paid \$Nil (2012 - \$179,055) to HuntMountain Resources Ltd. ("HuntMountain"), an entity controlled by the Company's Executive Chairman, for the rental of office space. Of the \$179,055 paid to HuntMountain in 2012, \$84,291 relates to settlement of a lease break fee, of that \$42,123 was applied to refundable deposit made to HuntMountain.

During the year ended December 31, 2013, the Company incurred \$137,298 (2012 - \$191,651) in professional fees expense relating to the services of the President of CCSA. Included in accounts payable and accrued liabilities as at December 31, 2013 was \$13,879 (December 31, 2012 - \$14,999) owing to the President of CCSA for professional geological fees. Included in prepaid expenses as at December 31, 2013, the Company

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

had a receivable due from the President of CCSA for \$1,087 (December 31, 2012 - \$45) for cash advanced for field expenses.

During the year ended December 31, 2013, the Company incurred \$22,444 (2012 - \$31,075) in general and administrative expenses relating to rent paid for office space to the President of CCSA. Included in accounts payable and accrued liabilities as at December 31, 2013 was \$Nil (December 31, 2012 - \$2,754) owing to the President of CCSA relating to rent paid for office space.

During the year ended December 31, 2013, the Company incurred \$53,924 (2012 - \$58,212) in professional fees expense relating to the accounting services of a director of CCSA. Included in accounts payable and accrued liabilities as at December 31, 2013, the Company had a payable owing to the director of CCSA of \$3,868 (December 31, 2012 - \$6,098). Included in prepaid expenses as at December 31, 2013, the Company had a receivable due from the director of CCSA of \$18 (December 31, 2012 - \$196) for cash advanced for miscellaneous expenses.

In conjunction with the Company's Qualifying Transaction, on December 23, 2009, the Company advanced \$200,000 to HuntMountain, CCSA's former parent corporation, as a refundable deposit. As at the year ended December 31, 2013, the balance owed by HuntMountain to the Company was \$nil (2012 - \$114,408). During the year, HuntMountain paid expenses, including professional fees and administrative and office expenses, on behalf of the Company that were offset against the amount owing.

All related party transactions are in the normal course of business.

Remuneration of directors and key management of the Company

The remuneration awarded to directors and to senior key management, including the Executive Chairman, the Chief Executive Officer, the Chief Financial Officer, the President of CCSA and a Director of CCSA, is as follows:

	Years ended	
	December 31,	December 31,
	2013	2012
Salaries and benefits	\$ 540,845	\$ 723,609
Consulting fees	297,812	368,363
Share based compensation	5,580	294,421
	\$ 844,237	\$ 1,386,393

Off Balance Sheet Arrangements

As at December 31, 2013, the Company had no off balance sheet arrangements that have, or are reasonably likely to have, a current or future effect on results of operations or the financial condition of the Company.

Financial Instruments and Other Instruments

The Company's financial instruments consist of cash and equivalents, accounts receivable, performance bond and accounts payable and accrued liabilities.

The Company characterizes inputs used in determining fair value using a hierarchy that prioritizes inputs depending on the degree to which they are observable. The fair value hierarchy establishes three levels to classify the inputs to valuation techniques used to measure fair value.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The three levels of the fair value hierarchy are as follows:

- Level 1: inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities. Active markets are those in which transactions occur in sufficient frequency and volume to provide pricing information on an ongoing basis.
- Level 2: inputs, other than quoted prices, that are observable, either directly or indirectly. Level 2 valuations are based on inputs, including quoted forward prices for commodities, market interest rates, and volatility factors, which can be observed or corroborated in the market place.
- Level 3: inputs are less observable, unavoidable or where the observable data does not support the majority of the instruments' fair value.

Fair value

As at December 31, 2013, there were no changes in the levels in comparison to December 31, 2012. The fair values of financial instruments are summarized as follows:

	December 31, 2013		December 31, 2012	
	Carrying amount \$	Fair value \$	Carrying amount \$	Fair value \$
Financial Assets				
<i>FVTPL</i>				
Cash and equivalents (Level 1)	2,364,062	2,364,062	5,220,727	5,220,727
<i>Available for sale</i>				
Performance bond (Level 1)	340,183	340,183	285,341	285,341
Marketable securities (Level 1)	47,828	47,828	-	-
<i>Loans and receivables</i>				
Accounts receivable	121,084	121,084	44,722	44,722
Financial Liabilities				
<i>Other financial liabilities</i>				
Accounts payable and accrued liabilities	274,364	274,364	811,016	811,016

Cash and equivalents and performance bond are measured based on level 1 inputs of the fair value hierarchy on a recurring basis.

The carrying value of accounts receivable and accounts payable and accrued liabilities approximate their fair value because of the short-term nature of these instruments. The Company assessed that there were no indicators of impairment for these financial instruments.

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, interest rate risk, market risk, liquidity risk and currency risk.

Financial risk management

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk, price risk and interest rate risk.

i. Currency risk

The Company holds cash balances, incurs payables and has receivables that are denominated in the Canadian Dollar, the United States Dollar and the Argentine Peso. These balances are subject to

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

fluctuations in the exchange rate between the Canadian Dollar, and the United States Dollar and the Argentine Peso, resulting in currency gains or losses for the Company.

As at December 31, 2013, the following are denominated in US dollars:

Cash and equivalents	\$ 5,957
Accounts payable and accrued liabilities	\$ 78,229

As at December 31, 2013, the following are denominated in Argentine Peso:

Cash and equivalents	\$ 8,094
Marketable securities	\$ 47,828
Performance bond	\$ 340,183
Accounts receivable	\$ 109,243
Other credits	\$ 80,085
Accounts payable and accrued liabilities	\$ 85,408

The Company is exposed to the financial risk related to the fluctuation of foreign exchange rates. A significant change in the currency exchange rates between the United States dollar relative to the Canadian dollar and the Argentine Peso could have an effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

At December 31, 2013, if the U.S. dollar strengthened or weakened by 10% relative to the Canadian dollar the impact on loss and other comprehensive loss would be as follows:

	<u>Impact on net loss and comprehensive loss</u>
U.S. Dollar Exchange rate – 10% increase	\$ 4,100
U.S. Dollar Exchange rate – 10% decrease	\$ (4,100)

At December 31, 2013, if the Argentine Peso strengthened or weakened by 10% relative to the Canadian dollar the impact on loss and other comprehensive loss would be as follows:

	<u>Impact on net loss and comprehensive loss</u>
Argentine Peso Exchange rate – 10% increase	\$ (43,094)
Argentine Peso Exchange rate – 10% decrease	\$ 43,094

ii. Credit risk

Credit risk is the risk of an unexpected loss if a third party to a financial instrument fails to meet its contractual obligations.

The Company's cash and equivalents are held through Canadian, United States and Argentine financial institutions.

The Company maintains its cash and equivalents in multiple financial institutions. The Company maintains cash in an Argentine bank. The Argentine accounts, which had a Canadian dollar balance of \$8,094 at December 31, 2013 (December 31, 2012 - \$675,090) are considered uninsured and may be at risk in case of the failure of the bank.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The Company controls for this risk by only keeping funds in Argentina sufficient to meet approximately two months of operating expenses.

The Company pays VAT to the Argentine government on all expenses in Argentina. This creates a VAT receivable owed by the government of Argentina. The Company's receivable at December 31, 2013 is \$548,676 (\$1,526,260 – undiscounted) (December 31, 2012 - \$682,074 (\$2,248,028 – undiscounted)). The Company believes this to be a collectible amount and it is backed in the strength and laws of the Argentine government. If for some reason the government did not pay, changed the laws, defaulted on the receivable or the Company never achieved any mineral production, the Company could lose the full value of the receivable.

iii. Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages liquidity risk through the management of its capital structure. The Company is dependent on the capital markets to raise capital by issuing equity in the Company to support operations. The current environment is prohibitive for the issuance of capital and there is no guarantee that should the Company need to raise new capital to support operations it will be able to do so on favorable terms, if at all. All of the Company's accounts payable and accrued liabilities are current and payable within one year.

iv. Price risk

The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. A dramatic decline in commodity prices could impact the viability of the Company and the carrying value of its properties. The Company is exposed to price risk with respect to commodity prices. There is minimal price risk at the present time as the Company is not yet in the production phase.

v. Interest rate risk

Interest rate risk is the impact that changes in interest rates could have on the Company's earnings and liabilities. In the normal course of business, the Company is not exposed to interest rate fluctuations because it has no interest bearing debt as at December 31, 2013 and invested cash is short-term in nature.

Standards and amendments to existing standards effective January 1, 2013

At the date of the Company's consolidated financial statements, certain new standards, amendments and interpretations to existing standards have been published but are not yet effective, and have not been adopted early by the Company. Management anticipates that all of the relevant pronouncements will be adopted in the Company's accounting policy for the first period beginning after the effective date of the pronouncement. Information on new standard, amendment and interpretation that is expected to be relevant to the Company's consolidated financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the Company's consolidated financial statements.

i) Amendments to IAS 1 Presentation of Items of Other Comprehensive Income

The Company has applied the amendments to IAS 1 titled Presentation of Items of Other Comprehensive Income in the current period. The amendments introduce new terminology for statement of comprehensive income and income statement. Under the amendments to IAS 1, a statement of comprehensive income is renamed as a statement of profit or loss and other comprehensive income and an income statement is renamed as a statement of profit or loss. The amendments to IAS 1 retain the option to present profit or

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

loss and other comprehensive income in either a single statement or in two separate but consecutive statements. However, the amendments to IAS 1 require additional disclosures to be made in the other comprehensive section such that items of other comprehensive income are grouped into two categories: (a) items that will not be reclassified subsequently to profit or loss; and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis. The amendments have been applied retrospectively, and hence the presentation of items of other comprehensive income has been modified to reflect the change. Other than the above mentioned presentation changes, the application of the amendments to IAS 1 does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.

- ii) Application of new and revised IFRSs on consolidation, joint arrangements, associates and disclosures
The Company has applied the requirements of IFRS 10 Consolidated Financial Statements, IFRS 11 Joint Arrangements, IFRS 12 Disclosures of Interests in Other Entities and IFRIC 20 Stripping Costs in the Production Phase of a Surface Mine in the current period.

The impact of the application of these standards is set out below.

Impact of the application of IFRS 10

IFRS 10 changes the definition of control such that an investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. The application of IFRS 10 has no impact on the Company's consolidated financial statements as the adoption did not result in a change in the consolidation status of any of the Company's subsidiaries.

Impact of the application of IFRS 11

IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC-13 Jointly Controlled Entities - Non-Monetary Contributions by Venturers. IFRS 11 deals with how a joint arrangement of which two or more parties have joint control should be classified. The application of IFRS 11 has no impact on the consolidated financial statements as the Company has no interests in joint arrangements.

Impact of the application of IFRS 12

IFRS 12 is a disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the application of IFRS 12 has resulted in additional disclosures in the Company's consolidated financial statements.

Impact of the application of IFRIC 20

IFRIC 20 sets out principles for the recognition of production stripping costs in the balance sheet. The interpretation recognizes that some production stripping in surface mining activity will benefit production in future periods and sets out criteria for capitalizing such costs. The application of IFRIC 20 has no impact on the consolidated financial statements as the Company is not yet in production.

- iii) Application of IFRS 13 Fair Value Measurement

The Company has applied the requirements of IFRS 13 Fair Value Measurement in the current period. IFRS 13 improves consistency and reduces complexity by providing a precise definition of fair value and a single source of fair value measurement and disclosure requirements for use across IFRSs. The requirements do not extend the use of fair value accounting but provide guidance on how it should be applied where its use is already required or permitted by other standards within IFRS. In general, the application of IFRS 13 has resulted in additional disclosures in the Company's consolidated financial statements.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Standards issued but not yet effective

The Company has not yet applied the following new standards, interpretations or amendments to standards that have been issued as at December 31, 2013 but are not yet effective. Unless otherwise stated, the Company does not plan to early adopt any of these new or amended standards and interpretations.

IFRS 2 *Share-based payment*

The amendments to IFRS 2, issued in December 2013 clarify the definition of “vesting conditions”, and separately define a “performance condition” and a “service condition”. A performance condition requires the counterparty to complete a specified period of service and to meet a specified performance target during the service period. A service condition solely requires the counterparty to complete a specified period of service. The amendments are effective for share-based payment transactions for which the grant date is on or after July 1, 2014.

IFRS 7 *Financial instruments: disclosures* and IAS 32 *Financial instruments: presentation*

Financial assets and financial liabilities may be offset, with the net amount presented in the statement of financial position, only when there is a legally enforceable right to set off and when there is either an intention to settle on a net basis or to realize the asset and settle the liability simultaneously. The amendments to IAS 32, issued in December 2011, clarify the meaning of the offsetting criterion "currently has a legally enforceable right to set off" and the principle behind net settlement, including identifying when some gross settlement systems may be considered equivalent to net settlement. The amendments will only affect disclosure and are effective for annual periods beginning on or after January 1, 2014.

IFRS 8 *Operating segments*

The amendments to IFRS 8, issued in December 2013, require an entity to disclose the judgments made by management in applying the aggregation criteria for reportable segments. The amendments will only affect disclosure and are effective for annual periods beginning on or after July 1, 2014.

IFRS 9 *Financial instruments*

IFRS 9 was issued in November 2009 as the first step in its project to replace IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 introduces new requirements for classifying and measuring financial assets that must be applied starting January 1, 2015, with early adoption permitted. The IASB intends to expand IFRS 9 during the intervening period to add new requirements for classifying and measuring financial liabilities, de-recognition of financial instruments, impairment and hedge accounting. The Company is currently assessing the impact of this standard on the consolidated financial statements.

IFRS 10 *Consolidated financial statements* and IFRS 12 *Disclosure of interests in other entities* and IAS 27 *Separate financial statements*

The amendments to IFRS 10, issued in October 2012, introduce a consolidation exception for investment entities. They do this by defining an investment entity and requiring an investment entity to measure subsidiaries at fair value through profit or loss in accordance with IFRS 9 *Financial instruments* or IAS 39 *Financial Instruments: Recognition and measurement*. The related amendments to IFRS 12, issued at the same time, require additional disclosure for investment entities. The amendments are effective for annual periods beginning on or after January 1, 2014.

IFRS 13 *Fair value measurement*

The Company applies the “portfolio exception”. Accordingly, it measures the fair value of financial assets and liabilities, with offsetting positions in market or counterparty credit risk, consistently with how market participants would price the net risk exposure. The amendments to IFRS 13, issued in December 2013, clarify that the portfolio exception applies to all contracts within the scope of IFRS 9 *Financial instruments* or IAS 39 *Financial instruments: Recognition and measurement*, regardless of whether they meet the definitions of

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

financial assets or financial liabilities in IAS 32 *Financial instruments: Presentation*. The amendments are effective for annual periods beginning on or after July 1, 2014.

IAS 16 Property, plant and equipment and IAS 38 Intangible assets

The amendments to IAS 16 and IAS 38, issued in December 2013, clarify how an entity calculates the gross carrying amount and accumulated depreciation when a revaluation is performed. The amendments are effective for annual periods beginning on or after July 1, 2014.

IAS 24 Related party disclosures

The amendments to IAS 24, issued in December 2013, clarify that a management entity, or any member of a group of which it is a part, that provides key management services to a reporting entity, or its parent, is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. This replaces the more detailed disclosure by category required for other key management personnel compensation. The amendments will only affect disclosure and are effective for annual periods beginning on or after July 1, 2014.

IAS 36 Impairment of assets

The amendments to IAS 36, issued in May 2013, require:

- Disclosure of the recoverable amount of impaired assets; and
- Additional disclosures about the measurement of the recoverable amount when the recoverable amount is based on fair value less costs of disposal, including the discount rate when a present value technique is used to measure the recoverable amount.

The amendments will only affect disclosure and are effective for annual periods beginning on or after January 1, 2014.

Commitments and Provision

- a) On March 27, 2007, the Company signed a definitive lease purchase agreement with FK Minera S.A. to acquire a 100% interest in the Bajo Pobre gold property located in Santa Cruz Province, Argentina. The Company may earn up to a 100% equity interest in the Bajo Pobre property by making cash payments and exploration expenditures over a five-year earn-in period. The required expenditures and ownership levels upon meeting those requirements are:

Year of the Agreement	Payment to FK Minera SA		Exploration Expenditures Required	Ownership
First year – 2007	US\$50,000	PAID	US\$250,000	0%
Second year – 2008	US\$30,000	PAID	US\$250,000	0%
Third year – 2009	US\$50,000	PAID	-	51%
Fourth year – 2010	US\$50,000	PAID	-	60%
Fifth year – 2011	US\$50,000	PAID	-	100%

After the fifth year, the Company is obligated to pay FK Minera S.A. the greater of a 1% net smelter royalty (“NSR”) on commercial production or US\$100,000 per year. The Company has the option to purchase the NSR for a lump-sum payment of US\$1,000,000 less the sum of all royalty payments made to FK Minera S.A. to that point.

As of December 31, 2013, the Company has made all required payments to F.K. Minera, however CCSA has not made sufficient exploration expenditures required by the Bajo Pobre contract. The parties to the contract have not finalized an amendment to the contract terms and therefore the Company’s ability to retain rights to explore the Bajo Pobre property is uncertain at this time. The Company does not believe that not making the exploration expenditures required by the FK Minera lease purchase agreement jeopardizes the Company’s Bajo Pobre project.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

The Company is actively working with F.K. Minera and the court to resolve this issue.

- b) In March 2007, the Company was the successful bidder for the exploration and development rights to the La Josefina project from Fomicruz. On July 24, 2007, the Company entered into an agreement with Fomicruz pursuant to which the Company agreed to invest a minimum of US\$6 million in exploration and development expenditures over a four year period, including US\$1.5 million before July 2008. The agreement provides that, in the event that a positive feasibility study is completed on the La Josefina property, a Joint Venture Corporation ("JV Corporation") would be formed by the Company and Fomicruz. A revised schedule for exploration and development of the La Josefina project was submitted in writing to Fomicruz and was adopted on May 3, 2011, mandating that an economic feasibility study and production decision be made by the Company for the La Josefina project by the end of 2013. The Company would own 91% of the joint venture company and Fomicruz would own the remaining 9%.

On November 15, 2012 the Company signed an amended agreement with Fomicruz extending the exploration term by 4 years; the new agreement requires the Company to make a production decision by the end of 2019. The Company's projected production date is December 31, 2019.

The Company has agreed to make a minimum investment of US\$12 million, of which it has already invested approximately US\$9 million. Additionally, and subject to proof of compliance with committed investments, the Company has the option to continue exploration for a second additional term of four years, ending on June 30, 2019, requiring it to make an additional investment US\$6 million, which will bring the total investments in the La Josefina Project to US\$18 million.

A participating interest of Fomicruz over the minerals and metals extracted from the field and the purchase option of up to a 49% participating interest in the incorporation of the future Company to be organized for the productions and exploitation of the project, having Fomicruz to contribute the equivalent of such percentage of the investments made. The Company has the right to buy back any increase in Fomicruz's ownership interest in the JV Corporation at a purchase price of US\$200,000 per each percentage interest owned by Fomicruz down to its initial ownership interest of 19%; the Company can purchase 10% of the Fomicruz's initial 19% JV Corporation ownership interest by negotiating a purchase amount with Fomicruz.

- c) On June 30, 2010, a former director and accounting consultant ("the Consultant") to the Company severed his business relationship with the Company. On August 5, 2010 the Consultant claimed that since 2006, he was actually an employee of, not a consultant to, CCSA. On September 7, 2010, the Argentine Ministry of Labor, Employment and Social Security filed a Certificate of Notice on CCSA and the Company indicating that a representative from CCSA and the Company must appear before a mediator to address the Consultant's claims. The certificates of notice stated the value of the Consultant's claim against the Company at 500,000 pesos (US\$126,811).

On March 18, 2011, a lawsuit was filed against the Company and its subsidiaries by the Consultant. The lawsuit claimed that the Consultant was an employee of the Company, not a consultant, since 2006. The total value of the claim was US\$249,041, including wages, alleged bonus payments, interest and penalties. The consolidated financial statements include a provision of \$125,000 at December 31, 2013. Management considers the lawsuit to be without merit and intends to defend the Company and its subsidiaries to the fullest extent possible.

On August 29, 2013, the Company was notified that \$80,085 was withheld from its Argentine bank account and placed in escrow with the Court pending the outcome of the lawsuit filed on March 18, 2011 against the Company.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

- d) On October 31, 2011, the Company signed an agreement with the owners of the Piedra Labrada Ranch for the use and lease of facilities on the same premises as the Company's La Josefina facilities. The term is for three years beginning November 1, 2011 and ending on October 31, 2014, including annual commitments of \$60,000.
- e) On April 1, 2012 the Company entered into a 9 month agreement with the surface rights holder of the Piedra Grande Ranch, located in Santa Cruz province, Argentina for access and use of their property. The agreement allows for the Company to engage in exploration activity as well as use the property and the facilities to house and store the Company's equipment and personnel. The Company agreed to consideration of US\$3,000 per month under this agreement. The initial term of the agreement ended on December 31, 2012, The Company was given an exclusive option to extend the agreement for 1 year, which it exercised. The agreement now ends on December 31, 2013. The Company's total obligation under this new agreement for the year ended December 31, 2013 is US\$36,000. The Company did not extend this agreement for another year.
- f) On May 3, 2012, the Company entered into an exploration agreement with Eldorado Gold Corp. ("Eldorado") for the purpose of exploring the Company's exploration projects in Santa Cruz province, Argentina. The agreement classifies projects into three stages: Stage I is an early exploration project that is not ready for exploration drilling; Stage II is a project that is drill ready, or being drilled; Stage III requires that the Company and its exploration partner jointly create a new company where by the Company will retain a 25% interest in the new company and Eldorado Gold Corp., or a nominee of their choice, will be granted a 75% interest in the new company. The Company had two Stage II projects, Bajo Pobre and La Valenciana, and one new Stage I project, La Josefina.

On May 24, 2013, the Company received one-time payments of \$200,000 for its La Valenciana project and \$125,000 for its La Josefina project, as well as a yearly lease payment of \$125,000 for its Bajo Pobre project.

On July 10, 2013, the Company was notified by Eldorado that they were terminating the agreement. The Company is actively pursuing new exploration partners.

At December 2013, the Company has paid severance for \$205,540, included as payroll expenses in the consolidated statement of loss and comprehensive loss, which became effective in the month of July 2013.

- g) On September 1, 2012, the Company moved into new office space. The Company signed a new office lease with a three-year term, which included the first four months for free. The office lease expires on December 31, 2015 and calls for monthly payments of approximately US\$2,886 in 2014; and US\$2,960 in 2015.

Minimal annual lease payments pursuant to the lease agreement are as follows (in US\$):

2014	\$ 34,632
2015	35,520
	<u>\$ 70,152</u>

In December 2013, the Company moved out of the office space and terminated the lease. The Company included in accounts payable and accrued liabilities as at December 31, 2013 US\$21,000 for settlement of a lease break fee.

- h) On October 1, 2012, the Company entered into an agreement with the surface owner of the Bajo Pobre Ranch in Santa Cruz province, Argentina. As consideration for access to the Bajo Pobre property and

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

use of the Bajo Pobre Ranch, the Company agreed to pay the owner \$5,000 per month over a period of 9 months ending on June 30, 2013. At the Company's sole option it can extend the agreement for an additional year, ending June 1, 2014. The Company's total commitment for 2013 under this agreement is US\$30,000. The Company did not extend the lease for an additional year.

- i) On November 1, 2012, the Company entered into an agreement with Fomicruz for the exploration of the La Valenciana project in Santa Cruz province, Argentina. The agreement is for a total of 7 years, expiring on October 31, 2019. The 7 years is broken into 3 economic periods, at the end of each period the Company will have the option of reporting its results to Fomicruz or terminating the agreement.

The agreement with Fomicruz requires the Company to spend USD \$5,000,000 in exploration on the project over 7 years. If the Company elects to exercise its option to bring the La Valenciana project into production it must grant Fomicruz a 9% ownership in a new JV Corporation to be created by the Company to manage the project. If Fomicruz elects to increase their ownership they can under the following formula up to a maximum of 49% interest.

- To purchase an additional 10% in the JV corporation, Fomicruz must reimburse the Company for 10% of the exploration expenses made by the Company during the exploration period;
- To purchase the next 10% interest in the JV corporation, Fomicruz must reimburse the Company for 20% of the exploration expenses made by the Company during the exploration period;
- To purchase a final additional 20% interest in the JV Corporation, Fomicruz must reimburse the Company for 25% of the exploration expenses made by the Company during the exploration period; bringing Fomicruz's total ownership interest in the JV Corporation to 49%.

At the Company's option it can purchase all but the 9% granted ownership interest in the JV Corporation from Fomicruz for USD \$200,000 per percentage point owned. The remaining 9% can be purchased for a mutually agreed amount, to be determined by negotiation between Fomicruz and the Company.

- j) On October 3, 2013, the Tax Authorities of the Santa Cruz Province, started a claim requesting omitted stamp tax on a) the Exploration Agreement signed during fiscal year 2012 (Amendment of "La Josefina" and "La Valenciana" contract) and b) Loan Agreement signed between the parent Companies and CCSA. Request is in the amount of \$248,673. This amount does not include potential fines. An accrual for this amount has been included in taxes payable in the consolidated statements of financial position.

On October 17, 2013, the answer to the requirement was filed.

As of January 22, 2014, the Secretary of Public Revenues of the Province of Santa Cruz approved the tax assessment. As of February 12, 2014, the Company filed a new request. As of the date of these consolidated financial statements, no answer has been received to the last requirement.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Outstanding Share Data

The authorized share capital of the Company consists of an unlimited number of common shares and preferred shares without nominal or par value. As at April 30, 2014, the Company's outstanding equity and convertible securities were as follows:

Securities	Outstanding
Voting equity securities issued and outstanding ⁽¹⁾	121,494,823 common shares
Securities convertible or exercisable into voting equity securities – stock options	Stock options to acquire up to 7,732,530 common shares ^{(2) (3) (4)}

Table Notes:

- (1) On April 10, 2013, 20,881,493 convertible preferred shares were converted into 20,881,493 common shares on the basis of one common share for each convertible preferred share held. The convertible preferred shares were all issued to HuntMountain, CCSA's former parent corporation, on December 23, 2009 in partial consideration for the Qualifying Transaction.
- (2) On February 27, 2012, the Company granted 1,250,000 stock options at an exercise price of \$0.30 per share to certain directors, officers, employees and consultants of the Company.
- (3) On April 23, 2013, the Company granted 400,000 stock options at an exercise price of \$0.10 per share to certain officers and employees of the Company.
- (4) On April 4, 2014, the Company granted 2,850,000 stock options at an exercise price of \$0.10 per share to certain directors and officers of the Company. The options granted vest immediately and expire on April 4, 2019.

Risks and Uncertainties

No History of Earnings

The Company has no history of earnings. The Company's properties are in the exploration stage of development. Additional external financing will be required to develop these properties further. There can be no assurances that any of the Company's properties will ever contain an economic ore body.

None of the Company's properties are currently in production, and although the Technical Report indicates mineral resources for La Josefina project, there can be no assurance that any proven or probable mineral reserves will be discovered or that any particular level of recovery of minerals will in fact be realized or that an identified mineral reserve or mineral resource will ever qualify as a commercially mineable (or viable) deposit which can be legally and economically exploited. The Company's ability to continue operations and fund its liabilities is dependent on management's ability to secure additional financing. Although the Company has been successful in pursuing additional sources of financing in the past, there can be no assurance it will be able to do so in the future. There can be no assurances that additional funding will be available, or available under terms favorable to the Company, or at all.

Title Risks

Although the Company has exercised due diligence with respect to determining title to the properties in which it has a material interest, there is no guarantee that title to such properties will not be challenged or impugned. The Company's mineral property interest may be subject to prior unregistered agreements or transfers and title

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

may be affected by undetected defects. Until competing interests, if any, in the mineral lands have been determined, the Company can give no assurance as to the validity of title to those lands or the size of such mineral lands.

Exploration and Development

Resource exploration and development is a highly speculative business, characterized by a number of significant risks including, among other things, unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production. The marketability of minerals the Company may acquire or discover may be affected by numerous factors that are beyond its control and that cannot be accurately predicted, such as market fluctuations, the proximity and capacity of milling facilities, mineral markets and processing equipment, and such other factors as government regulations, including regulations relating to royalties, allowable production, the import and export of minerals and environmental protection, the combination of which factor may result in the Company not receiving an adequate return of investment capital.

All of the claims in which the Company has acquired or has a right to acquire an interest are in the exploration stage only and are without a known commercially-mineable ore body. Development of the subject mineral properties would follow only if favorable exploration results are obtained.

There is no assurance that the Company's mineral exploration and development activities will result in any discoveries of commercial bodies of ore. The long-term profitability of its operations will in part be directly related to the costs and success of its exploration programs, which may be affected by a number of factors.

Substantial expenditures are required to establish reserves through drilling and to develop the mining and processing facilities and infrastructure at any site chosen for mining. Although substantial benefits may be derived from the discovery of a major mineralized deposit, no assurance can be given that minerals will be discovered in sufficient quantities to justify commercial operations or that funds required for development can be obtained on a timely basis.

The Company is required to obtain required permits from various government departments to carry out its work programs. There is no guarantee that all required permits will be granted on terms satisfactory to the Company, or at all. If such permits are not received, the Company may not be able to carry out or complete its business objectives.

The Company has not conducted sufficient exploration activity pursuant to its option agreement with FK Minera SA. The Company has not satisfied all of its USD\$500,000 exploration commitment as required by the Bajo Pobr  agreement, nor have the parties to the contract finalized amendment of the contract terms. The Company's ability to retain rights to explore the Bajo Pobr  property is uncertain at this time.

Loss of Bajo Pobr  Property

The Company has made the required lease payment investments but not all the work commitment investment, as required under the Bajo Pobr  option agreement. FK Minera SA has agreed to amend the Bajo Pobr  option agreement to permit the Company to cure its contractual breach. There is no guarantee, however, that this amending agreement will be executed in a timely manner, or at all. As a result, the Company could lose its rights to explore the Bajo Pobr  property.

Loss of Foreign Issuer Status

The Company may at some future date determine that it has ceased to qualify as a "foreign private issuer" for the purposes of United States federal securities laws. This determination is performed each year as of June 30,

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

being the last business day of its second fiscal quarter. Should this occur, the Company would not be able to avail itself of the rules and forms designated for foreign private issuers until the Company is able to once again establish its qualification as a foreign private issuer. Absent registration under the U.S. Securities Act, under most circumstances, securities issued by the Company during such times as that the Company fails to qualify as a "foreign private issuer," would be "restricted securities" for the purposes of the United States Securities Act of 1933, as amended (the "U.S. Securities Act"), and would be issued with a U.S. restrictive legend, regardless of whether they are issued in an "offshore transaction" pursuant to Regulation S, or are issued in the United States pursuant to an exemption from the registration requirements of the U.S. Securities Act and any applicable state securities laws. The Company's inability to issue securities outside the United States without resale restrictions imposed by the U.S. Securities Act and regulations thereunder may make it difficult or impossible to complete securities offerings on favorable terms, or at all.

Uninsured or Uninsurable Risks

Exploration, development and production of mineral properties is subject to certain risks, and in particular, unexpected or unusual geological operating conditions including rock bursts, cave-ins, fires, flooding and earthquakes. It is not always possible to insure fully against such risks and the Company may decide not to take out insurance against such risks as a result of high premiums or for other reasons. Should such liabilities arise, they could have a material adverse impact on the Company's operations and could reduce or eliminate any future profitability and result in increasing costs and a decline in the value of the securities of the Company.

Operating Hazards and Risks

Mineral exploration and development involves risks which even a combination of experience, knowledge and careful examination may not be able to overcome. Operations in which the Company has a direct or indirect interest will be subject to hazards and risks normally incidental to exploration, developments and production of minerals, any of which could result in work stoppages, damage to or destruction of property, loss of life and environmental damage. The nature of these risks is such that liabilities might exceed insurance policy limits, the liabilities and hazards might not be insurable or the Company may elect not to insure itself against such liabilities due to high premium costs or other factors. Such liabilities may have a materially adverse effect upon the Company's financial condition.

Environmental Risks, Regulations, Permits and Licenses and Other Regulatory Requirements

The Company's operations may be subject to environmental regulations promulgated by government agencies from time to time. Environmental legislation provides for restrictions and prohibitions on spills, releases or emissions of various substances produced in association with certain mining industry operations, such as seepage from tailings disposal areas that would result in environmental pollution. A breach of such legislation may result in the imposition of fines and penalties. In addition, certain types of operations require the submission and approval of environmental impact assessments. Environmental legislation is evolving in a manner that means standards are stricter, and enforcement, fines and penalties for non-compliance are more stringent. Environmental assessments of proposed projects carry a heightened degree of responsibility for companies and directors, officers and employees. The cost of compliance with changes in governmental regulations has a potential to reduce the profitability of operations.

The Company's operations, including development activities and commencement of production on its properties, require permits from various federal, provincial or territorial and local governmental authorities, and such operations are and will be governed by laws, and regulations governing prospecting, development, mining, production, exports, taxes, labor standards, occupational health, waste disposal, toxic substances, land use, environmental protection, mine safety and other matters.

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Such operations and exploration activities are also subject to substantial regulation under applicable laws by governmental agencies that may require that the Company obtains permits from various governmental agencies. There can be no assurance, however, that all permits that the Company may require for its operations and exploration activities will be obtainable on reasonable terms or on a timely basis or at all or that such laws and regulations will not have an adverse effect on any mining project which it might undertake.

Failure to comply with applicable laws, regulations, and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. Parties engaged in mining operations may be required to compensate those suffering loss or damage by reason of mining activities and may have civil or criminal fine or penalties imposed for violations of applicable laws or regulations and, in particular, environmental laws.

Amendments to current laws, regulations and permits governing operations and activities of mining companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or production costs or reduction in levels of production at producing properties or require abandonment or delays in development of new mining properties.

Competition

The mining industry is intensely and increasingly competitive in all its phases, and the Company will compete with other companies that have greater financial and technical resources. Competition in the precious metals mining industry is primarily for mineral rich properties which can be developed and operated economically and businesses compete for the technical expertise to find, develop, and operate such properties, the skilled labor to operate the properties and the capital for the purpose of financing development of such properties.

Such competition could adversely affect the Company's ability to acquire suitable producing properties or prospects for mineral exploration, recruit or retain qualified employees or acquire the capital necessary to fund its operations and develop its properties.

Dependence on Management

The Company is largely dependent on the performance of its directors and officers. There is no assurance the Company will be able to maintain the services of its directors and officers or other qualified personnel required to operate its business. The loss of the services of any of these persons could have a material adverse effect on the Company and its prospects.

Fluctuating Mineral Prices

The mining industry is heavily dependent upon the market price of metals or minerals being mined. There is no assurance that, even if commercial quantities of mineral resources are discovered, a profitable market will exist at the time of sale. Factors beyond the Company's control may affect the marketability of metals or minerals discovered, if any. Metal prices have fluctuated widely, particularly in recent years, and the Company will be affected by numerous factors beyond its control. The effect of these factors on the Company's operations cannot be predicted. If mineral prices decline significantly, it could affect the Company's decision to proceed with further exploration of its properties.

Future Financing

The Company's continued operation will be dependent upon its ability to generate operating revenues and to procure additional financing. There can be no assurance that any such revenues can be generated or that other financing can be obtained on acceptable terms to the Company, if at all. Failure to obtain additional financing

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

on a timely basis may result in delay or indefinite postponement of further exploration and development or forfeiture of some rights in some or all of the Company's properties. If additional financing is raised by the issuance of shares from treasury, control of the Company may change and shareholders may suffer additional dilution. If adequate funds are not available, or are not available on acceptable terms, the Company may not be able to further explore and develop its properties, take advantage of other opportunities, or otherwise remain in business. Events in the equity market may impact the Company's ability to raise additional capital in the future. The Company's loss of "foreign private issuer" status under US securities law may also adversely affect future financings.

Future Acquisitions

As part of the Company's business strategy, it may seek to grow by acquiring companies, assets or establishing joint ventures that it believes will complement its current or future business. The Company may not effectively select acquisition candidates or negotiate or finance acquisitions or integrate the acquired businesses and their personnel or acquire assets for its business. The Company cannot guarantee that it can complete any acquisition it pursues on favorable terms, or that any acquisitions completed will ultimately benefit its business.

Volatility of Share Price

In recent years, the securities markets in the United States and Canada, and the Exchange in particular, have experienced a high level of price and volume volatility, and the market prices of securities of many companies have experienced wide fluctuations in price that have not necessarily been related to the operating performance, underlying asset values or prospects of such companies. There can be no assurance that continual fluctuations in price will not occur. It may be anticipated that any quoted market for the shares will be subject to market trends and conditions generally, notwithstanding any potential success of the Company in generating revenues, cash flows or earnings.

Conflicts of Interest

Certain directors and officers of the Company will and may continue to be involved in the mining and mineral exploration industry through their direct and indirect participation in corporations, partnerships or joint ventures which are potential competitors of the Company. Situations may arise in connection with potential acquisitions or opportunities where the other interests of these directors and officers may conflict with the interest of the Company. Directors and officers of the Company with conflicts of interest will be subject to and follow procedures set out in applicable corporate and securities legislation, regulation, rules and policies

Reliability of Historical Information

The Company has relied, and the Technical Report is based, in part, upon historical data compiled by previous parties involved with the La Josefina project. To the extent that any of such historical data is inaccurate or incomplete, the Company's exploration plans may be adversely affected.

Dividends

The Company has never paid a dividend on its common shares or preferred shares. It is not anticipated that the Company will pay any dividends on its common shares or preferred shares in the foreseeable future.

Adverse fluctuations in currency exchange rates

The Company will maintain most of its working capital in Canadian and United States dollars. However, a significant portion of the Company's operating costs are incurred in Argentinean pesos. Accordingly, the

HUNT MINING CORP.
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE YEAR ENDED DECEMBER 31, 2013

Company will be subject to fluctuations and volatility in the rates of currency exchange between the Canadian dollar, United States dollar and the Argentinean peso, and these fluctuations could materially affect the Company's financial position and results of operations as costs may be higher than anticipated. The costs of goods and services could increase due to changes in the value of the Canadian dollar, the United States dollar, or the Argentinean peso. Consequently, operation and development of the Company's properties might be more costly than the Company anticipates.

Economic and political instability in Argentina may affect the Company's mineral projects

All of the Company's material properties are located in Argentina. There are risks relating to an uncertain or unpredictable political and economic environment in Argentina.

During an economic crisis in 2002 and 2003, Argentina defaulted on foreign debt repayments and on the repayment on a number of official loans to multinational organizations. In addition, the Argentinean government has renegotiated or defaulted on contractual arrangements.

In January 2008, the Argentinean government reassessed its policy and practice in respect of export duties and began levying export duties on mining companies operating in the country.

There also is the risk of political violence and increased social tension in Argentina and Argentina has experienced periods of civil unrest, crime and labor unrest.

Certain political and economic events such as acts or failures to act by a government authority in Argentina, and acts of political violence in Argentina, could have a material adverse effect on the Company's ability to operate.

Limitations on the transfer of cash or other assets between the Company and its subsidiaries or joint venture partners

The Company is a Canadian company that is conducting operations through foreign (principally Argentinean) subsidiaries, and substantially all of the Company's assets consist of equity in these entities. Accordingly, any limitation on the transfer of cash or other assets between the parent corporation and these entities, or among these entities, could restrict the Company's ability to fund its operations efficiently. Any such limitations, or the perception that such limitations might exist now or in the future, could have an adverse impact on available credit and the Company's valuation and stock price.

Current Global Economic Conditions

Recent market events and conditions, including disruptions in the international credit markets and other financial systems and the deterioration of global economic conditions, could impede the Company's access to capital or increase its cost of capital. Failure to raise capital when needed or on reasonable terms may have a material adverse effect on the Company's business, financial condition and results of operations.

Service of Process

A majority of the directors and officers of the Company reside outside of Canada and it will therefore be difficult to effect service of process (service of legal proceedings) on such directors and officers.

Critical Accounting Policies, Judgments and Estimates

Details regarding the Company's accounting policies and judgments and estimates are presented in Note 4 and Note 6 to the Company's consolidated financial statements for the year ended December 31, 2013.
